

Q3 Operations Review

Northwind Logistics · prepared by Sam Okafor

Summary

The on-time delivery rate was 94.2% in Q3, up from 91.5% in Q2. Damage claims fell to 0.8% of shipments. The Tacoma warehouse reached 87% of its capacity in September, the highest level this year.

Fuel costs per shipment dropped after the switch to optimized routes in July.

Shipments by month

Month	Shipments	On time	Damage claims
July	3,120	93.1%	29
August	3,410	94.0%	27
September	3,655	95.3%	25

Risks for Q4

Peak season staffing: we need 25 seasonal workers in place by November 15. Without them, the on-time rate is expected to fall below 90% in December.

Overflow storage: Tacoma will run out of space in November unless additional storage is leased.
